

In the Specification:

Please replace the paragraph beginning on page 12, line 9 with the following amended paragraph:

For example, if the through wire 9 and the input signal line 10 have the wire width of 100 μm , the diameter of the test pad 16 is set as a value between 1000 μm and 2000 μm . In such a setting, the test pad 16 has ~~an enough large~~ a large enough area, and can become easily connectable with a test probe.
